
Table of Contents

Table of Contents

Chapter 1 - Introduction

Chapter 2 - An Overview of ADAMS/WT

Program Capabilities and Limitations.....	2-1
Required ADAMS Experience Level.....	2-2
ADAMS/WT and ADAMS	2-3
Version 2.0 Enhancements	2-4

Chapter 3 - Model Description

WT Coordinate Systems	3-1
Wind & Rotation Directions.....	3-2
Tower Construction.....	3-3
Nacelle and Power Train	3-5
Hub Construction.....	3-6
Blade Construction.....	3-7
Aerodynamics	3-9

Chapter 4 - Low Level Elements

Tapered Beam	4-1
Tapered Part	4-4
Motor-Generator	4-6
Wind	4-9
Simple Aerodynamic Force	4-12

Chapter 5 - Aggregate Elements

Tower.....	5-2
Guy Wires.....	5-6
Nacelle.....	5-9
Power Train.....	5-13
Stator.....	5-14
High-Speed Shaft.....	5-16
Motor-Generator	5-19
Low-Speed Shafts.....	5-20
Torsion Only.....	5-20
Fully Flexible	5-23
Gearing.....	5-26
Rotor Hubs	5-27
2-Bladed Teetering Hub.....	5-28
3-Bladed Rigid Hub.....	5-30

Table of Contents

4-Bladed Rigid Hub.....	5-31
5-Bladed Rigid Hub.....	5-32
Hub Flexibility	5-35
Rotor Blades.....	5-37
Blade Properties.....	5-38
Flexible Blade.....	5-39
Rigid/Hinged Blade	5-43
Blade Relocation.....	5-47
Pitch Definition	5-48
Adding Tip Weights.....	5-51

Chapter 6 - Aerodynamic Loads

Simple Aerodynamics.....	6-2
AeroDyn Aerodynamics	6-4
Special AeroDyn MARKERs	6-6
Induced Inflow.....	6-7

Chapter 7 - System Assembly Tutorial & Example Case 1

Outline.....	7-1
General Set-Up.....	7-2
Tower.....	7-2
Nacelle.....	7-5
Power Train.....	7-6
Hub.....	7-9
Blade #1.....	7-12
Blade #2.....	7-14
Teetering Spring & Stops	7-15
Tip Weights	7-19
Aerodynamics.....	7-21
Gravity	7-25
Output Requests	7-26
Running the Analysis.....	7-28
Statics Note	7-38
Visualizing Output.....	7-38
Plotting Output	7-38

Chapter 8 - Model Enhancement & Example Case 2

Outline.....	8-1
Startup	8-1
Rotor Blade Removal	8-4
New Rotor Blades.....	8-4
Tip Weights	8-7
Aerodynamics.....	8-8

Table of Contents

Modifying Low-Speed Shaft.....	8-10
Output Requests	8-12
Running the Simulation	8-12
Visualizing Results	8-20
Plotting Output	8-20

Chapter 9 - More Model Enhancement & Example Case 3

Outline.....	9-1
Startup	9-2
Deleting Old Output Requests.....	9-4
Modifying Old Low-Speed Shaft.....	9-4
Creating New Flexible Low-Speed Shaft	9-7
Putting New Shaft in Model	9-8
Removing Old Shaft	9-10
New Output Requests.....	9-11
Running the Simulation	9-12
Visualizing Results	9-14
Plotting Output	9-14

Chapter 10 - Three-Bladed Turbine Tutorial & Example Case 4

Outline.....	10-1
General Set-Up.....	10-2
Tower.....	10-2
Nacelle	10-5
Power Train.....	10-6
Hub.....	10-9
Rotor Blades.....	10-12
Blade Relocation.....	10-12
Tip Weights	10-15
Aerodynamics.....	10-17
Gravity	10-21
Output Requests	10-22
Running the Analysis.....	10-24
Animations	10-31
Plotting Output	10-32

Chapter 11 - Upwind, Counter-Clockwise, 4-Bladed Turbine

Outline.....	11-1
General Set-Up.....	11-2
Tower.....	11-2
Nacelle	11-3
Power Train.....	11-4
Hub.....	11-7

Table of Contents

Creating Blades.....	11-9
Relocating Blades.....	11-10
Aerodynamics.....	11-12
Gravity	11-15
Output Requests	11-16
Running the Analysis.....	11-18
Visualizing Results	11-20
Plotting Output.....	11-20

APPENDICES

Appendix A - Model Connections Reference.....	A-1
Appendix B - Conversion Factors.....	B-1
Appendix C - Rotor Modeling Data Requirements (Buhl)	C-1
Appendix D - Derivation of Tapered Beam Stiffness Matrices	D-1
Appendix E - Derivation of Tapered Part Inertias	E-1
Appendix F - Tower Data File Format.....	F-1
Appendix G - Rotor Blade Data File Format	G-1
Appendix H - AeroDyn Aerodynamics (University of Utah).....	H-1

Appendix I - Installation Instructions.....	I-1
--	------------

Appendix J - Thevenin's Equation for Motor-Generator Torque	J-1
---	-----
